

Creative Industry Districts: An Analysis of Dynamics, Networks and Implications on Creative Clusters in Shanghai (Advances in Asian Human-Environmental Research)

Since the late 1990s, there have been broad discussions concerning the rapid rise of the creative economy. Creative or cultural industry is seen as the new engine of the regional growth for both developed economies and emerging nations. At the point of transition in economy and society, China is recently striving to transform its economy from made in China towards created in China. This book provides an insight into creative industries and spaces in Shanghai, which is the fastest growing megacity in China and the center of modern economic development on a global scale. Underpinned by new approaches from economic geography and urban studies, it deals with the new relations between the creative economy and urban environment in Shanghai. Over the last decade, creative clusters have been rapidly emerging in particular locations in the central city of Shanghai. This spatial phenomenon is explained in the book through an analysis of dynamics, networks and implications.
