

National Accounts Main Aggregates 1960-1997: Comptes Nationaux Principaux Agregats 1960-1997 (National Accounts of Oecd Countries/Comptes Nationaux Des Pays De Locde)

The 1999 edition of the National Accounts: Main Aggregates, Volume I covers expenditure on the GDP, cost of components of GDP and finance of gross capital formation. These internationally comparative statistics are based on exchange rates (US-dollars, volume and price indices) and purchasing power parities. Data are shown back to the 1960s in most cases. They are generally expressed in national currencies but are also shown in US dollars for major aggregates and for country groupings for the OECD, OECD-Europe and the European Union. National Accounts: Detailed Tables, Volume II will be published in July 1999 and, for most countries, will provide 14 years of detailed national accounts data: main aggregates, consumption expenditure and gross fixed capital formation, and GDP by kind of activity, all at current and constant prices; cost components of value added and employment by kind of activity; and income and outlay and capital accounts for institutional sectors.
